

Janet Agada

Product Manager · 0→1 Products

Abuja, Nigeria · agadaejanet@gmail.com · linkedin.com/in/janet-agada-6a7372200 · janet-agada-portfolio.vercel.app

SUMMARY

0→1 Product Manager who turns ambiguous ideas into structured digital platforms. Shipped 6 products across 6 industries — including a live event-planning marketplace, a beauty-business operating system that runs real payroll, and AI-powered tooling. Strong in system architecture, requirement documentation, and engineering coordination; fluent in building AI/LLM features. Built for resource-constrained markets; ready for remote, global teams.

SELECTED PRODUCT WORK

Glown · Vertical SaaS (glown.io)

Product Manager · Live since Feb 2026

The operating system for a beauty business — booking, reviews, marketing, messaging, and payroll.

- Grew a booking tool into a full operating system: reviews, client segmentation, multi-channel messaging (SMS/WhatsApp/email), and staff payroll.
- Designed commission logic that attributes each completed booking to staff and rolls it into monthly payroll — bookings, earnings, and pay in one system.
- 15+ businesses live; flagship salon manages 388 clients and runs monthly payroll up to ₦3.2M.

Confette · Event-Planning Marketplace (confette.co)

Product Manager & Architect · Live

Nigeria's three-sided event marketplace — organisers post budgets, verified vendors bid.

- Architected a three-sided platform (organiser, vendor, admin) with budget-first planning and competitive bidding.
- Modelled the full bidding lifecycle as a state machine (Draft → Open → Bidding → Vendors Booked → Completed, plus Disputed), specifying every guard, edge case, and notification.
- Designed vendor trust & safety: verification, suspension cascades, and counter-bid budget guards that prevent silent over-commitment.

Optima AI · Enterprise AI

Product Manager

AI-powered document processing and analysis for enterprise clients.

- Coordinated engineering teams across time zones to ship an AI document-processing and analysis application.
- Wrote PRDs precise enough that engineering rarely needed clarification.

ADDITIONAL WORK

- **AmanaCruise** (Hospitality) — cruise & travel booking platform; live Feb 2026, 400+ users, ₦800K+ first-quarter revenue.
- **Traders College** (EdTech) — trading-education LMS; 30+ learners and \$1,000+ in early revenue post-beta.
- **Juyonna** (Travel & Logistics) — modular multi-service travel ecosystem, 10+ verticals; Phase 1 complete.

SKILLS & TOOLS

Product: 0→1 product development · product & system architecture · PRD and specification writing · user & problem research · marketplace design · state-machine modelling · AI/LLM product design · engineering coordination · launch & QA.

Tools: Notion · Jira · Trello · Figma · Lovable · Cursor · ChatGPT · Claude · Magicpatterns · Slack · Paystack.

EDUCATION

B.Sc. Biochemistry — Kaduna State University
